TSL8329M

2.0-4.2 GHz GaAs plus GaN Dual channel

20-Watt Receiver Front End

Application Note: TSL8329M EVB A

Application Note

3300 MHz~4000 MHz

5.0 V 90 mA-HG mode

5.0 V 45 mA-LG mode

Rev-2.1

1. General Description

The TSL8329M is a dual-channel, integrated RF, front-end, multichip module designed for different applications. The device operates from 2.0 GHz to 4.2 GHz. The TSL8329M is configured in dual channels with a cascading, two-stage, LNA and a high GaN based SPDT switch. In high gain mode, the cascaded two-stage LNA and switch offer a low noise figure of 1 dB and a high gain of 32 dB at 3.6 GHz with an output third-order intercept point (OIP3) of 35 dBm (typical) at high gain mode. In low gain mode, one stage of the two-stage LNA is in bypass, providing 13 dB of gain at a lower current of 45 mA. In power-down mode, the LNAs are turned off and the device draws 5 mA. In transmit operation, when RF inputs are connected to a termination pin (TERM-CHA or TERM-CHB), the switch provides low insertion loss of 0.45 dB at 3.6 GHz and handles long-term evolution (LTE) average power (9 dB peak to average ratio (PAR)) of 43 dBm for full lifetime operation. The device comes in a RoHS compliant, compact, 6 mm × 6 mm, 40-Pin QFN.

TSL8329M-EVB-A is an evaluation board specially tuned for frequency range of 3300 MHz~4000 MHz applications. Its application in the areas of Wireless infrastructure, TDD massive multiple input & multiple output, active antenna systems, TDD-based communication systems etc.

5. TSL8329M-EVB-A Board Measurement Summary

Parameter	Test Condition	Typical Values	Unit
Operational frequency Range		3.3 G-4.0 G	Hz
Gain	HG	35-30	dB
	LG	13-12	dB
Noise Figure (De-embedded)	HG	0.9-1.2	dB
	LG	0.9-1.2	dB
EVB Noise Figure	HG	1.4-1.3	dB
	LG	1.4-1.3	dB
Input Return Loss	HG	Less than -6	dB
	LG	Less than -9	dB
Output Return Loss	HG	Less than -8	dB
	LG	Less than -4	dBm
OP1dB	HG	18-21	dBm
	LG	8-10.5	dBm
OIP3 (With 1 MHz tone spacing)	0 dBm per tone,	32-37	dBm
	-2 dBm per tone,	17-21	dBm
Current, Id	HG	90	mA
	LG	45	
	PD	5	
Insertion Loss	Transmit operation at 3.6 GHz	0.45	dB
Channel to Channel Isolation Between RXOUT-CHA & CHB	At 3.6 GHz Receive operation	40	dB
Between TERM-CHA & TERM-CHB	Transmit operation	55	dB
SWITCH ISOLATION ANT-CHA to TERM-CHA and ANT-CHB to TERM-CHB	Transmit operation, PD-CHAB = 0 V	25	dB
